

SMART INDIA HACKATHON 2026

TITLE PAGE

- Problem Statement ID - 10
- Problem Statement Title- AI-based healthcare decision support.
- Theme- Medical and Healthcare
- PS Category- Software
- Team ID- SIH26-T26
- Team Name- CARPE DIEM

IDEA TITLE

❖ Proposed Solution (Describe your Idea/Solution/Prototype)

- *The problem is not lack of healthcare data- It is failure to convert data into timely action.*
- *Point out preventable health crisis by computing risk score.*
- *The innovation is action layer on top of existing healthcare infra.*
- *Privacy- preserving AI platform that helps health-care workers make data driven decisions.*
- *Using multiple level of information: Individual data+ Contextual data+ Risk score*

ABDM & HMIS Interoperability: *Uses secure FHIR APIs to fetch ABHA-linked patient records (with consent) and integrates HMIS/IDSP data for real-time, contextualized clinical decisions.*

Optimized Frontline Interface: *A lightweight, secure(RBAC/encrypted), and multilingual app that delivers automated high-risk alerts to health workers in low-bandwidth settings.*

Feasibility:

- AI, APIs and databases integrate hospital data while encryption and consent-based access protect patient privacy.
- Simple, multilingual and voice-based software can be piloted in one hospital and scaled easily.
- Hospital subscriptions + integration fees + enterprise licensing + analytics + government/NGO partnerships.

Risks and their Solution:

- Fragmented/outdated data, AI errors and sensitive patient information may create risks → use **verified hospital data, encryption, consent-based access and human validation.**
- Low digital literacy, language barriers and difficulty integrating with existing hospital systems may limit adoption → provide **simple multilingual/voice UI, API-based integration and phased hospital testing.**
- Patients and hospital staff may hesitate to adopt a new system software → **Pilot testing, staff involvement, user feedback and gradual deployment.**

IMPACTS

- Reducing preventable complications and adverse maternal outcomes.
- Making healthcare workers jobs easier by reducing the problems causing by scattered healthcare data.

BENEFITS

- Better treatment will be possible because the patient's past health records will be easily available.
- Helps in better decision making and improves the treatment of different diseases.

- World Health Organization.** *Recommendations on Digital Interventions for Health System Strengthening.* 2019.
- World Health Organization.** *Monitoring and Evaluating Digital Health Interventions: A Practical Guide to Conducting Research and Assessment.*
- National Health Authority, Government of India.** *Ayushman Bharat Digital Mission — FAQ.*
- National Health Authority, Government of India.** *ABDM Health Data Management Policy.*
- World Health Organization.** *Digital Implementation Investment Guide (DIIG).* 2020.

IMPORTANT INSTRUCTIONS

Please ensure below pointers are met while submitting the Idea PPT:

1. Kindly keep the maximum slides limit up to six **(6)**. (Including the title slide)
2. Try to avoid paragraphs and post your idea in points /diagrams / Infographics /pictures
3. Keep your explanation precise and easy to understand
4. Idea should be unique and novel.
5. You can only use provided template for making the PPT without changing the idea details pointers (mentioned in previous slides).
6. You need to save the file in PDF and upload the same on portal. No PPT, Word Doc or any other format will be supported.

Note - You can delete this slide (Important Pointers) when you upload the details of your idea on SIH portal.
